HackBeanpot 2020

Learn more about the companies that have partnered with HackBeanpot for this year's hackathon! Hear about the awesome things they're working on and what it's like to be a part of their teams. If you're interested in learning more than what's provided here, be sure to connect with representatives at the event and feel free to reach out to anyone who has provided their contact information in this book.

We're on a mission to reimagine how work gets done

A black and white photograph of four diverse professionals—two men and two women—looking upwards and pointing their fingers towards the sky. They appear to be in a modern office environment. The background is slightly blurred.

Gartner recently named Catalant Technologies as a **Cool Vendor** that transforms talent to drive the digital workplace, and highlighted it in different categories **across four Hype Cycle reports**.

Interested in joining our team?

We're building a world-class team, and are looking for talented, scrappy, fun, and passionate people to help us reimagine how work gets done. Think that sounds like you? Contact Jennie MacDougall, Engineering Manager at jmacdougall@gocatalant.com or view our listings at goCatalant.com/careers.

CATALANT

KYRUUS

Our products help patients find the right healthcare provider – for their specific condition, at the right time, and at the best location for them. For those thrust into the often confusing, disjointed healthcare system, the prospect of finding the right provider in a sea of unknowns can be daunting and frustrating. Our goal is to change that. We are humans helping humans expedite and enhance the patient journey, so patients can get the care they need when they need it.

Power Advocate

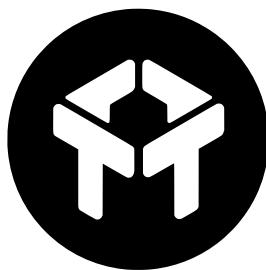

PowerAdvocate, a Verisk Analytics business, is a Boston-based technology and services company that leads the energy data industry by providing energy companies with clarity into their complex data. Our cloud-based SaaS products are fueled by our data assets, currently at \$4+ trillion, innovative software technology and proprietary machine-learning algorithms. We like to call ourselves an “established start-up”, still entrepreneurial, everyone from our coops to our senior team members are valued for their work. Working at PowerAdvocate means having the opportunity to work in a collaborative culture, with highly innovative developers, who take pride in making meaningful contributions to PowerAdvocate.

PathAI

PathAI's mission is to advance medicine with intelligent pathology. We are the world's leading provider of AI-powered technology for the pathology laboratory. PathAI's platform provides end-to-end data-driven pathology analysis, resulting in fast, accurate and standardized pathologic diagnoses.

PathAI's goal is to make an enduring impact on patient care by helping hundreds of millions of people receive accurate diagnoses and effective therapies.

Drift

Drift is the new way businesses buy from businesses. With its quickly evolving set of tools and playbooks, Drift is the world's leading conversational marketing platform, trusted by top enterprise businesses like Ellie Mae, GrubHub, InVision, Marketo, Okta, Outreach, Eventbrite, Vidyard, and over 50,000 other businesses. Sales and marketing teams rely on Drift to connect now with the customers who are ready to buy now. Based in Boston, Drift was founded by serial marketing technology entrepreneurs David Cancel and Elias Torres and is backed by leading venture capitalists including CRV, General Catalyst, and Sequoia. N Northeastern University Khoury College of Computer Sciences

Khoury College of Computer Sciences at Northeastern University engages students in rigorous academic learning and real-world co-op experiences. Our renowned faculty shape minds, spark innovation, and inspire ideas. Our research breaks new ground to solve everyday problems. We believe computer science is everywhere. It's in the technology that brings people together, the data that fuels discoveries, the health care that saves lives. In a world where computer science matters for everyone, Khoury leads the way.

At Intuit, we get up every morning with our hearts beating fast, driven by the knowledge that we're transforming the world of consumer and small business finance. We're obsessed with our customers. Because of this, we're continually challenging and disrupting ourselves, to improve their financial lives. It's why our products — TurboTax, Mint and QuickBooks — continue to resonate with 50 million consumers around the globe. We are a Fortune 500 fintech company and ranked as the #1 Best Workplace in Canada in 2019.

DATADOG

At Datadog, we're on a mission to build the best platform in the world for engineers to understand and scale their systems, applications, and teams. We operate at high scale - trillions of data points per day - providing always-on alerting, metrics visualization, logs, and application tracing for tens of thousands of companies. Our engineering culture values pragmatism, honesty, and simplicity to solve hard problems the right way.

We are looking for great students to join us for a co-op to help us collect, aggregate, visualize, and analyze extremely high-scale metrics, logs, and application data.

Upstatement

Upstatement is a digital studio headquartered in Boston that builds applications for clients that unite brand and product through design and engineering. We've launched apps, sites and tools for groups like ESPN, PBS, MIT and hundreds of other clients around the world.

PLURALSIGHT

Pluralsight's technology skills platform gives tech leaders confidence their teams can deliver on critical objectives. Our Skills product empowers teams to keep up with the pace of change, put the right people on the right projects and boost productivity through expert courses, skill assessments and one-of-a-kind analytics. Our Flow product gives engineering leaders objective data and visibility into workflow patterns to debug development processes and resolve bottlenecks. Together, they enable teams to develop, measure and deploy critical skills at scale and deliver products faster.
